

Pre-Paid pricing

Pre-Paid pricing

Pre-Paid model settled in advance (payment before the service). The funds on the account are perpetual, the top-up value determines the unit rates. Higher top-up means lower the unit price. The invoice is issued on the first working day after topping up the account. Topping up of the account takes place automatically (eg PayU) or manually (payment on account, pro-forma).

Threshold billing services

The amount of the top-up determines the amount of the settlement rate	<u>ECO SMS</u> message (with a random number)	<u>FULL SMS</u> message (with an alphanumeric, 2-way or numeric name)
50 - 149 PLN	0.16 PLN	0.19 PLN
